

If you are ill at the time of an examination you are registered for, you can submit a doctor's certificate to that effect to the examination office (of course when you are well again). If possible, you should inform us beforehand so that the illness can be registered for that examination in Basis and then the examiner is also informed. The result of the examination will be set to "KR" for ill (*krank*). If you do not submit a certificate from the doctor the result will be set to "NE" (did not participate (*nicht erschienen*)) and the grade will be set to 5.0.

In general:

For all cases where you could not participate in an examination for personal reasons (also unplanned, e.g. illness) there are two possible examination dates per semester. Hence, any combination of the results (regardless of the order):

"failed" and "ill"

"absent" and "failed"

"ill" and "absent"

mean that you failed the module according to § 11 Abs. 3 (MA-PO 2006) and § 11 Abs. 5 (MA-PO 2014) Masterprüfungsordnung.

Special case:

Occasionally, someone is ill for both the 1st and 2nd examination in one semester. If a doctor's certificate is submitted for both dates, the registration for the module for the complete semester can be deleted.
